

To open the James MILNE Family Tree file:

IF YOU ARE USING A COMPUTER:

Click on this [link](#)

After you have clicked on the link, the file will open in Protected View. To see the pictures, you must click on “**Enable Editing**” to disable Protected View.

The pictures have been cropped from various photos that I’ve taken or received over time. Not all of the pictures are ideal. If you don’t like any of the pictures, then please send me better ones.

IF YOU ARE TRYING TO DO THIS ON A MOBILE PHONE:

Stop now. It won’t work.

...unless you have installed a special App that allows you to use the full features of Microsoft EXCEL on your mobile phone. Such Apps exist for Android, but I have not tested them.

This file displays 7 generations of descendants of James Milne, and their spouses, in the form of an EXCEL spreadsheet. Unlike some other family trees, it goes from left to right rather than top to bottom. To move around the chart simply use the arrow keys (up, down, left, right). If necessary, you can enlarge or reduce the chart using the “View” then “Zoom” commands.

This chart includes pictures of some of the people. A small red triangle in the top right-hand corner of the cell indicates that this person's picture is included. To see the picture, simply move the cursor over the person's name.
